

Evol.TM

Evol. Marine & Automotive Spare Parts

Time-critical logistics for marine & automotive spare parts

SHIP SPARES & MARINE EQUIPMENT ■ AUTOMOTIVE PARTS & AFTERMARKET

Delivering Critical Parts, Supporting Global Operations.

Evol. Marine & Automotive

Specialist logistics solutions for spare parts, components and technical equipment where timing, accuracy and availability matter.

From urgent replacement parts to scheduled replenishment, Evol coordinates international transport, customs, warehousing and final delivery for marine and automotive supply chains.

The Right Part ■ The Right Place ■ The Right Time

Spare Parts Logistics That Keeps Operations Moving

We support shipowners, ship managers, vessel operators, shipyards and marine suppliers, alongside automotive distributors, dealerships, workshops and service centres. Each movement is coordinated around the required delivery point, operating schedule and urgency, helping reduce downtime and keep essential parts available.

Evol.TM

Ship Spares & Marine Equipment

- Engine and propulsion components
- Pumps, valves and hydraulic equipment
- Electrical, electronic and navigation equipment
- Maintenance and repair spares
- Deck and engine-room equipment
- Technical stores and consumables

- Tyres, wheels and accessories
- Workshop tools and equipment
- Replacement parts and service consumables

Warehousing and inventory support

Vessel and workshop delivery coordination

Cross-trade shipments

Packing and cargo protection

Dangerous goods coordination

Shipment updates and proof of delivery

Our Approach. Built Around Your Operations.

TIME-CRITICAL COORDINATION

We assess routing and transport options for urgent replacement parts, coordinating collection, customs clearance and final delivery around the required deadline. Shipment updates keep your team informed as the movement progresses.

GLOBAL SUPPLIER COORDINATION

We coordinate collections from multiple suppliers and countries, consolidating parts where practical and arranging onward transport through a single point of coordination.

SHIP SPARES & VESSEL DELIVERY

We coordinate ship spares in transit with appointed ship agents and destination partners. Customs and delivery arrangements are planned around estimated vessel arrival and departure times (ETA/ETD), port calls and agreed delivery windows, supporting urgent repairs and scheduled maintenance.

AFTERMARKET & OUR SUPPORT

We support automotive distributors, dealerships and workshops with planned replenishment and urgent Vehicle Off Road (VOR) requirements. Supplier collection, transport and final delivery are coordinated to support parts availability and help reduce vehicle downtime.

Keeping Operations Moving

Evol.Marine & Automotive

Logistics support for:

- Urgent ship spares for vessel port calls
- Parts for drydock and scheduled maintenance
- Multi-supplier consolidation for fleet requirements
- Stock replenishment for dealers and distributors
- VOR replacement parts for vehicles awaiting repair
- Components and equipment for workshop operations

One point of coordination from supplier collection to delivery confirmation.

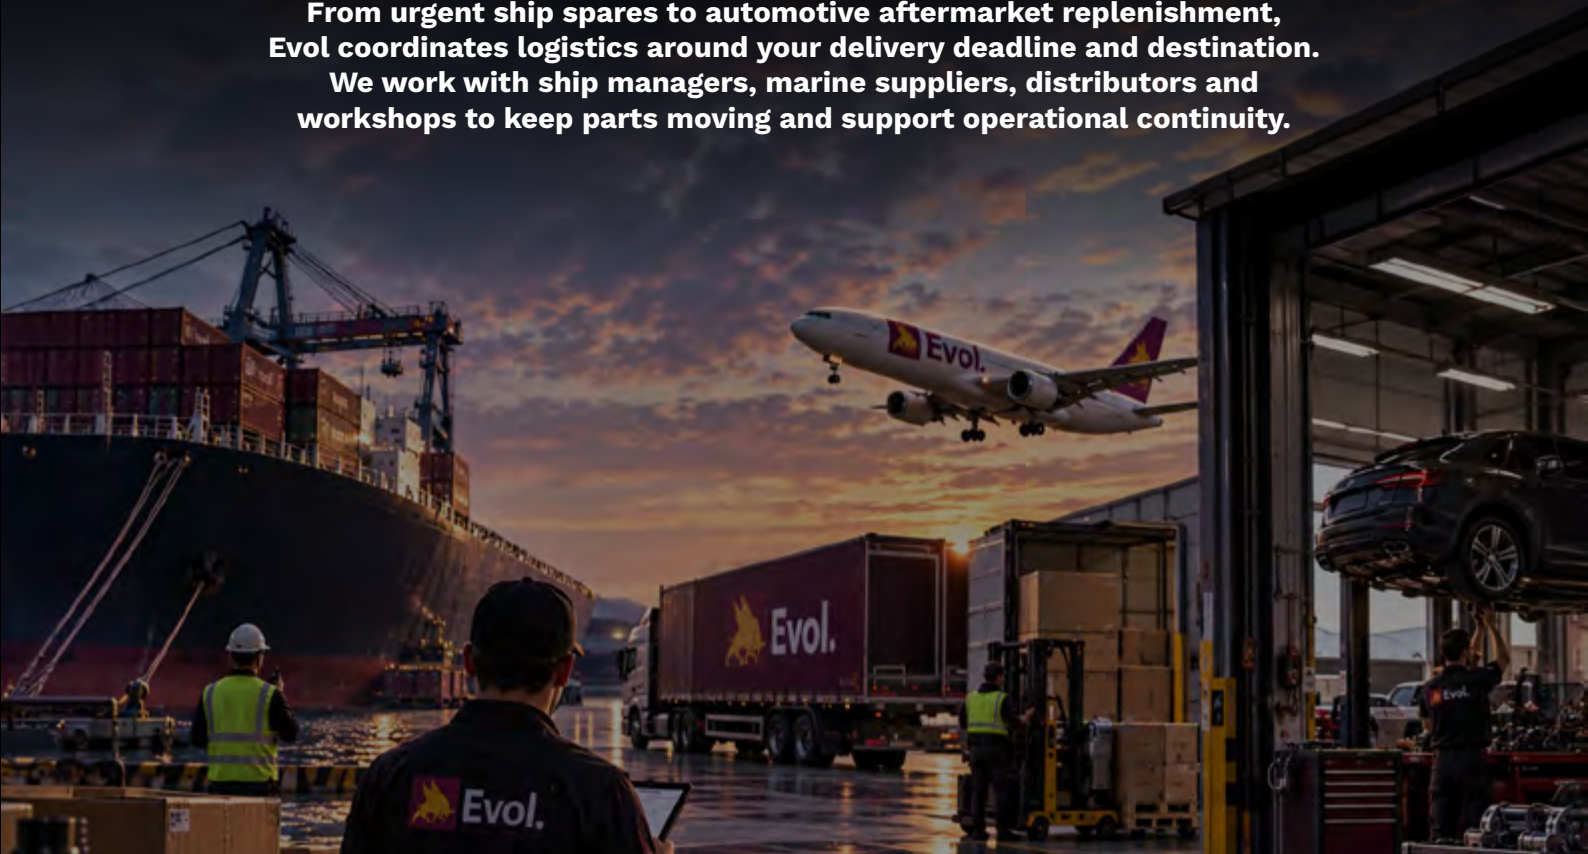

Evol.TM

Marine & Automotive Spare Parts

From urgent ship spares to automotive aftermarket replenishment, Evol coordinates logistics around your delivery deadline and destination.

We work with ship managers, marine suppliers, distributors and workshops to keep parts moving and support operational continuity.
